Master of Science
Regulatory Trade Compliance

Program Objectives: The Master of Science – Regulatory Trade Compliance (MS-RTC) is a postsecondary, graduate degree that centers on the practical application and understanding of international trade compliance law and its program objectives, building on Dunlap-Stone University's commitment to offer "Professionally Significant Degrees®." It offers a solid exploration and analysis of international trade compliance law, processes and concepts across a number of industrialized nations and global trade regimens supportive of managing the risks associated with operations involving the global supply chain.

Why Earn this Degree?

Internationally, regulatory trade compliance management is expected to be one of the fastest growing fields of endeavor as laws and regulations continue to intensify amid the landscape of the growing global marketplace. The demand for experts is being fueled by the rapidly increasing fines and penalties that U.S. companies and others face for violating the regulations. The number of legal experts needed to manage and mitigate the risks associated with the increase in trade far out paces the supply.

MS-RTC Admissions Requirements
The program is open to students who have completed a Bachelor degree from an accredited American institution or equivalent.

Entry Prerequisites

Applicants must demonstrate basic mastery of U.S. regulatory compliance laws prior to entry into the program. Ask an Advisor for details.
